

Clean, Affordable, Reliable Energy

Minnesota is moving toward renewable energy as its go-to power source. More than twice as many Minnesotans work in clean energy as compared to the number of lawyers, accountants and auditors, web developers, and real estate agents combined. Additionally, Minnesotans have cheaper electric bills than the national average as policymakers and business leaders all over the state are choosing to invest in clean, efficient energy technologies.

Connecting Midwest Clean Energy Reliably & Affordably

Today, throughout the Midwest, clean energy contributes to keeping the lights on 24/7/365. Tomorrow, a modernized grid will connect clean energy economies all over the Midwest. Homegrown clean energy will be the backbone of reliable electricity when and where it is needed. Transmission is the key to unlocking this growth and resiliency for generations to come.

A modern grid grows reliable Midwest clean energy.

Delivering Our Midwest Renewable Energy

Clean Grid Alliance (CGA) is a nonprofit organization whose 50+ members include wind, solar and storage developers, manufacturers, nonprofit environmental, public interest and clean energy advocacy organizations, farmer organizations, and other businesses that support renewable energy. CGA has a long history of success in expanding market opportunities through technical expertise in transmission and regulatory processes, policy work, and public education and outreach to build support.
